I've written before about "Ten Great Public Health Achievements of the 20th Century," which the Centers for Disease Control and Prevention published in 1999. Now, CDC has put together a list of ten great public health achievements from 2001 to 2010, based on nominations from the agency's public health scientists. Here are the ten achievements from the first decade of the 21st century:

## **Historical Developments in Public Health and the 21st Century**

The average life expectancy of a child born in the US in 1900 was 50 years. By 2010, this number had increased 60% to 80 years.<sup>1</sup> Biomedical, epidemiological, and behavioral research combined with public policy played a major role in this gain. Below are major public health milestones of the last 100 years.
