The lettering on the hood of Rich Stuck's 1957 Custom tells the tale. While Ford rated the supercharged 312 engines at 300 hp in 1957, it is well documented that they produced in excess of that number. Suffice it to say that with modern parts and modifications, the engine delivers considerably more than 300 hp now.

How to build a reliable, powerful Ford Y-block

The Y-block engine is a family of overhead valve V8 automobile engines produced by Ford Motor Company. The engine is well known and named for its deep skirting, which causes the engine block to resemble a Y. It was introduced in 1954 and used in Ford's vehicles to replace the side-valved Ford Flathead V8, and replaced by the Ford FE engine (in medium cars) and the Ford Windsor engine (in small ...
