Answer Key Chapter 7 - Microbiology | OpenStax

Adenovirus, a nonenveloped animal virus that causes respiratory illnesses in humans, uses protein spikes protruding from its capsomeres to attach to the host cell. Nonenveloped viruses also include those that cause polio (poliovirus), plantar warts (papillomavirus), and hepatitis A (hepatitis A virus).

12.1 Viruses - Concepts of Biology - 1st Canadian Edition

7. True or false: Once inside a T cell (or CD4 cell), HIV uses it as a virus-making factory to make copies of itself. The new viruses then leave the T cell and destroy other healthy T cells as they multiply inside the body. T cells invaded by HIV can no longer fight infections properly. 8.

Quiz Answer Key - KidsHealth

It is not clear why the virus stops replicating within the nerve cells and expresses few viral proteins but, in some cases, typically after many years of dormancy, the virus is reactivated and causes a new disease called shingles (Figure 7). Whereas chickenpox affects many areas throughout the body, shingles is a nerve cell-specific disease ...

Viruses: Are they alive? Are they dead? Are they...undead? Learn more about these fascinating (and clinically important) particles that occupy a "gray area" between living and non-living things. If you're seeing this message, it means we're having trouble loading external resources on our website.

Viruses | Biology | Science | Khan Academy

The Discovery of Viruses 1. What is a bacteriophage? 2. What are viruses? 3. What is a capsid? 4. How does a typical virus get inside a cell? 5. What occurs when viruses get inside cells? They are particles of nucleic acid, protein, and in some cases lipids that can reproduce only by infecting living cells. a virus's protein coat

Viruses and Prokaryotes - PC\|MAC

A virus cannot be killed by antibiotics because antibiotics are used to kill living organisms. Viruses are not "living." The strongest defense against a virus is the body's own immune system which will attack the virus. Recent studies have shown that light can also kill a virus so in some cases, lasers are being used to kill viruses.
