The first attempt to produce a list of cruck buildings was made by J T Smith in 1958, as the basis for the first proper distribution map of the technique. This list was not published, but formed the starting point for a list made by R F Taylor, which in its turn was the basis for the compilation of the Catalogue of cruck buildings (Alcock 1973).

A cruck or crook frame
is a curved timber, one
of a pair, which
supports the roof of a
building, used
particularly in
England. This type of

File Type PDF A Catalogue Of Cruck Buildings

timber framing consists of long, generally naturally curved, timber members that lean inwards and form the ridge of the roof. These posts are then generally secured by a horizontal beam which then forms an "A" shape
