Atoms For Peace A Future

On December 8, 1953, President Dwight Eisenhower proposed in a speech to the United Nations that nuclear nonproliferation be promoted by offering peaceful nuclear technology to countries that would renounce nuclear weapons. Today the value of that basic trade-off—atoms for peace—is in question, along with the institutions that embody it.

The twenty-five contributors to *Atoms for Peace* grapple in many ways with nuclear proliferation, nuclear terrorism, and the future of nuclear energy. They include officials and scientists from a wide range of agencies and institutions. Among them are officials or former officials from Israel, Egypt, Pakistan, Canada, Korea, and Japan, from the U.S. departments of state, energy, and defense, the U.S. Senate, the National Security Council, the U.S. Arms Control and Disarmament Agency, the ...

Atoms for Peace: A Future after Fifty Years? | Wilson Center

"Atoms for Peace" was the title of a speech delivered by U.S. President Dwight D. Eisenhower to the UN General Assembly in New York City on December 8, 1953. I feel impelled to speak today in a language that in a sense is new – one which I, who have spent so much of my life in the military profession, would have preferred never to use. That new language is the language of atomic warfare. The United States then launched an "Atoms for Peace" program that supplied equipment and information to ...

Atoms for Peace - Wikipedia

One might be surprised to discover that *Atoms for Peace* established the creation of atomic energy programs for Argentina, Brazil, India, Pakistan and Iran (to name but a few), through providing training to thousands of students internationally, as well as providing nuclear technology transfers, and financing (most of which ended in the wake of JFK's assassination).
