fast, or in an irregular manner, send rapid and disorganized electrical signals to the heart causing the upper two chambers of the heart, the left and right atria, to fibrillate (contract irregularly or too fast).

### **Atrial Fibrillation: How to Use Diet to Manage Atrial ...**

Atrial fibrillation is an irregular and often rapid heart rate that occurs when the two upper chambers of your heart experience chaotic electrical signals. The result is a fast and irregular heart rhythm. The heart rate in atrial fibrillation may range from 100 to 175 beats a minute. The normal range for a heart rate is 60 to 100 beats a minute.

### **Atrial fibrillation - Symptoms and causes - Mayo Clinic**

The irregularity can make the heart work less efficiently. In addition, atrial fibrillation that occurs over a long period of time can significantly weaken the heart and lead to heart failure.
