Because multiple assets can be created for a cluster we highly recommend that a project number be set up for each cluster. Project numbers are part of the accounting record and will allow you to run reports for a given cluster. Once the project number is set up it must then be entered in the accounting line on the requisition.

Overview of the Percentage of Completion Method. The percentage of completion method calculates the ongoing recognition of revenue and expenses related to longer-term projects based on the proportion of work completed. By doing so, the seller can recognize some gain or loss related to a project in every accounting period in which the project continues to be active.
