Android apps connected to C++Builder DataSnap Server Handling DataSnap (REST) server methods through PHP Sharing DB connection between multiples DataSnap Server Modules Video: Connecting Android applications with DataSnap Server - Delphi Conference Brazil 2010

### Android apps connected to Delphi DataSnap Server ...

To demonstrate how easy is to use the Enterprise Connectors with FireDAC, I decided to build a native Salesforce mobile client for Android and iOS, using Delphi and Firemonkey on the client side, and DataSnap/FireDAC on the server side.

### Delphi + Enterprise Connectors + DataSnap = Salesforce ...

I wrote an Android application that uses DataSnap with Mobile connectors to communicate with a delphi server. The application works without problems if imposed as a target platform Android-10 (ver. 2.3.3). Instead, if I get over this version does not work anymore, While debugging, I think I saw an exception about a null pointer inside the Java code generated by delphi.

### datasnap/delphi mobile connectors android target [Edit ...

I have written DataSnap server (Delphi Rio, Firedac) as an exe file. It is located on the cloud server and works ok. I call it from Android Firemonkey application. Application needs to display some data from database. My DataSnap connects easily to SQL server database located on another cloud server: I specify IP, port, database, username ...

### Connecting Android apps to C++Builder DataSnap Server

I've built a simple Web Android Application based on the jQuery Mobile client connected to a Delphi DataSnap server I already blogged about. The application has only a full screen Web browser control, and behaves exactly like the mobile web page. However, you can activate it with the icon (I know, I've been lazy and left iin the default Android ...

### Web Android Application for Delphi DataSnap

Suhaimin wrote:at client side (android) ,what i have to setting at unidac component so that can connect to remote DB postgresql via internet network. See the UniDAC demo project for a sample application that connects to PostgreSQL server via Internet and not using DataSnap Server.

### a Mobile Application that Connects to the DataSnap Server ...

In this tutorial Andreano Lanusse shows how to create REST Servers using C++ and DataSnap, and how to call them from Android applications.

### Android apps connected to C++Builder DataSnap Server ...

DataSnap is a distributed computing technology available in RAD Studio. The RAD Studio XE release greatly increases the cross-platform and cross-language reach of DataSnap, particularly for REST implementations.. The DataSnap dispatcher handles all the client-based communication and marshalling automatically, so developers can usually forget about the communication and marshalling mechanics ...

### Connections with DataSnap

Hello, check if the port and IP setting of client are the same as at server. Its hard to tell what is wrong. After start serwer check connection using REST Debugger (tools -> Rest Debugger) or making datasnap connection in DataExplorer.
