Empathic design caters to real user needs, rather than supposed "averages". One of the main objectives of the empathise stage is to identify user needs and behaviours that are latent, or unarticulated. As a designer, it's important to distinguish between what people say they would do in a certain situation, and what they actually do.

## **What Is Empathy In Design Thinking? And Why Is It Important?**

Design for an Empathic World is like a love letter to architects, artists, dreamers and all who enjoy making and inhabiting place.", ...[suggests] ways to create a better world that focuses on the people who use and are affected by the infrastructure, as well as the need to reconnect design to human and natural elements., With great wisdom and lucidity, Sim Van der Ryn illuminates our world, bestowing his insights into design and gracing us with his extraordinary art.

## **Design for an Empathic World : Reconnecting People, Nature ...**

"Design for an Empathic World" has touched on so many things that are close to my heart and expressed them so well. At this time where a "green building" industry seems to have gone mad in its thirst for foam and more efficient ways to blow air around inside hermetically sealed boxes, Sim Van Der Ryn's words about the wisdom of nature, are like a beacon of light!
