In Your Dog Is Your Mirror, dog trainer Kevin Behan proposes a radical new model for understanding canine behavior: a dog's behavior and emotion, indeed its very cognition, are driven by our emotion. The dog doesn't respond to what the owner thinks, says, or does; it responds to what the owner feels.

Domestic dogs display an extraordinary level of phenotypic diversity in morphology and behavior. Furthermore, due to breeding practices introduced during the nineteenth century, these phenotypic traits have become relatively 'fixed' within breeds, allowing biologists to obtain unique insights regarding the genetic bases of behavioral diversity, and the effects of domestication and artificial selection on temperament.

Dog intelligence or dog cognition is the process in dogs of acquiring, storing in memory, retrieving, combining, comparing, and using in new situations information and conceptual skills. Studies have shown that dogs display many behaviors associated with intelligence.

Dog intelligence - Wikipedia

The Canine Cognition Center at Yale is a new research facility in the Psychology Department at Yale University. Our team of Yale scientists studies how dogs think about the world. Our center is devoted to learning more about canine psychology—how dogs perceive their environment, solve problems, and make decisions.
