separate from the C: drive on your computer. Here's an example mount command: `mount c c:\games\` This command mounts the C:\Games directory on your computer as the C: drive in DOSBox.

## **How To Use DOSBox To Run DOS Games and Old Apps**

DOSBox is a command-line program, configured either by a set of command-line arguments or by editing a plain text configuration file. For ease of use, several graphical front-ends have been developed by the user community.. A popular feature of DOSBox is its ability to capture screenshots and record gameplay footage. The video is compressed using the lossless Zip Motion Block Video codec.

## **DOSBox - Wikipedia**

MOUNT.COM is a command inside DOSBox that can connect physical folders and drives to virtual drives inside DOSBox. The mounted drive does not automatically refresh files changed outside of DOSBox. You can refresh these files on all mounted drives by activating the Swap Image event (Hot key: Ctrl F4) to have access to changed files automatically when, for example, the drive is mapped as a floppy.
