Engineering Dynamics Incorporated (EDI) is an engineering consulting firm providing solutions to vibration problems for a wide range of industries world wide. Vibration is a major cause of machine and plant downtime, as well as a safety concern.

Engineering Dynamics

Engineering Dynamics Dynamics is a branch of mechanics that studies the analysis of forces and torques and their effect on motion on bodies and systems. To put this in simpler terms, dynamics is the study of particles in motion. The most important equation in engineering dynamics is the sum of the forces equal mass times acceleration.

This primer is intended to provide the theoretical background for the standard undergraduate, mechanical engineering course in dynamics. It grew out of the author's desire to provide a compliment to the standard texts on the subject in which the gap between the theory presented and the problems to be solved is often times too large.
