Financial accounting involves recording, summarizing, and reporting the stream of transactions and economic activity resulting from business operations over a period of time.

How Does Financial Accounting Help Decision-Making?

As such, financial accounting is better understood not as a representation of 'economic' reality, but rather as the projection/performance of a boundary that allows for the carving out of 'economic' interests from reality; an effect which it achieves by the simple device of ignoring anything that cannot be ascribed a monetary value.

The boundary of the 'economic': Financial accounting ...

You can't understand financial accounting without an understanding of today's economic environment.
