The real solution was probably just to save the \$50 in fluid and do the transmission right off the bat. I'd say if you suspect the transmission is starting to wear maybe just drive it til it breaks because the fluid may speed things up either way it doesn't harm what's already broken.

Check Brake Fluid on Wikipedia.. DOT 5 is not interchangeable or compatible with DOT 3, 4, and 5.1 fluids and can cause catastrophic system failure.. Dot 3, 4, and 5.1 are glycol ether based. They are compatible, but like motor oils, you should use the recommended or higher grade fluid. Dot 4 and 5.1 also have borate ester to handle higher temperatures.

Fluid statics or hydrostatics is the branch of fluid mechanics that studies "fluids at rest and the pressure in a fluid or exerted by a fluid on an immersed body".. It encompasses the study of the conditions under which fluids are at rest in stable equilibrium as opposed to fluid dynamics, the study of fluids in motion.Hydrostatics are categorized as a part of the fluid statics, which is the ...
