Abstract. These are some notes on introductory real analysis. They cover the properties of the real numbers, sequences and series of real numbers, limits of functions, continuity, differentiability, sequences and series of functions, and Riemann integration. They don't include multi-variable calculus or contain any problem sets.

Introduction to
Psychoanalysis or
Introductory Lectures
on Psycho-Analysis is a
set of lectures given by
Sigmund Freud, the
founder of
psychoanalysis, in
1915-1917. The 28
lectures offer an
elementary stock-
taking of his views of
the unconscious,
dreams, and the theory
of neuroses at the time
of writing, as well as
offering some new
