The 14 bhp (10 kW) gain over the 500
H1 put the H2's output well ahead of its
close rivals, the air-cooled four-stroke
Honda CB750 and the liquid-cooled two-
stroke Suzuki GT750. To help address
the speed wobble issue, the H2 came
with a friction-type steering damper, as
well as a built-in frame lug to attach a
hydraulic steering damper.

Kawasaki H1 500 Mach III Kawasaki's early 1970s sportsbike range was dominated by light, powerful two-stroke triples: from the 250cc SI through to the fearsome H2 750cc, the KH500 being a suitable midway point. Developed from the earlier H1, the original triple of 1969, the KH500 had a piston-ported two-stroke engine in a steel-tube cradle frame.

History. By mid-1960s, the US had become the largest motorcycle market. American riders were demanding bikes with more horsepower and higher maximum speeds. Kawasaki already had the largest-displacement Japanese machine with their 650 cc four-stroke W series, but it did not fit the niche Kawasaki was aiming for. Honda had introduced its Honda CB450 in 1965 and in 1969, the Suzuki T500 Titan ...

Allen had made Kawasaki two-stroke
triples into four, five and six-cylinder
machines; he recommended a four as
the best rider and a five as the best
show bike. At first I was going for an
Kawasaki H2, but after seeing a
photograph of a 1969 Kawasaki H1 and
a 1972 H2 side-by-side, I decided I
preferred the old school look of a first
series H1 ...
