**How to Become a New Food Product Developer | Academic Invest**

In the food industry, just as any other industry, product and process development is considered a vital part – indeed the lifeblood – of smart business strategy. Failure to develop new and improved products relegates firms to competing solely on price which favours the players with access to the lowest cost inputs (land, labour etc).

**A background paper - Food and Agriculture Organization**

Influence Consumer Preferences. Building brand awareness is the first step—you need a method of influencing consumer preferences. Set up a blind taste test at a neutral location, letting consumers sample your product and that of your competitors. Find out which brand they prefer, and most importantly, find out why.
