Dr. Candace Pert (1946-2013) was an internationally recognized neuroscientist and pharmacologist who published over 250 research articles. She was a significant contributor to the emergence of Mind-Body Medicine as an area of legitimate scientific research in the 1980's, earning her the title of "The Mother of Psychoneuroimmunology", and "The Goddess of Neuroscience" by her many [...]

### **Candace Pert, PhD - Explorer of the Brain, Bodymind & Beyond**

The main theory is that emotional state is caused by a variety of chemicals, particularly peptides. These molecules not only have an influence on your emotions but on your overall physical health as well, you can't really separate the two. I think this theory was groundbreaking at the time, but much more widely accepted now.
