### Otitis Media In Infants And

What are the symptoms of otitis media (middle ear infection)? Symptoms of ear infection include: Ear pain: This symptom is obvious in older children and adults. In infants too young to speak, look for signs of pain like rubbing or tugging ears, crying more than usual, trouble sleeping, acting fussy/irritable. Loss of appetite: This may be most noticeable in young children, especially during bottle feedings. Pressure in the middle ear changes as the child swallows, causing more pain and less ...
