$ cd tools # ./dect_cli Now we have access to the dect_cli console. It doesn't give you a nice prompt, just a blank line, waiting for input. Let's give it a few commands: verb This will set verbose output ON. Now, here in the US we need to set the appropriate channel range for "DECT 6.0".

How To: Sniffing DECT Wireless Devices - Security Weekly
attack your DECT-phone to proove ist secure. Remember that sniffing/tapping into a phone is illegal. In germany there is a law (§201) and probably some others that may put you in jail for 5 years if you do so. So do only test your own phone or phones you have explicit permission to do so by the resonsible owner of that phone.

DEDECTION for fun and profit
Over on GitHub programmer 'znuh' has uploaded a new RTL-SDR compatible GNURadio based tool for DECT decoding. DECT is an acronym for 'Digital Enhanced Cordless Telecommunications', and is the wireless standard used by modern digital cordless phones. In most countries DECT communications take place at 1880 - 1900 MHz, and in the USA at 1920 - 1930 MHz.
